

Corpro Companies Europe Ltd

Corpro Companies Inc. and Corpro Companies Europe Ltd are wholly owned subsidiaries of The Aegion Corporation, a NASDAQ listed company in the U.S.A. Corpro is part of Aegion's Corrosion Protection Platform and has operations in the UK, Europe, USA, Canada and the Middle East.

Aegion has three operating divisions:

- Corrosion Protection
- Infrastructure Solutions
- Energy Services

Aegion Group acquired Corpro in 2009 as part of its strategic objective to expand its services offering in the Corrosion Protection sector.

History

Corpro Companies Inc. (Corpro) acquired the Wilson Walton Group in 1994, which itself was established in 1965. As part of the overall strategy of unification of international group activities and to avoid market confusion, Wilson Walton International (UK) Ltd changed its name in April 1998 to Corpro Companies Europe Ltd (Corpro Europe).

In 1998, Corpro added the BASCO Group (Bosford Anode Supply Company Limited, BASCO Limited and ACTEL - Activated Titanium Electrodes Limited) to the worldwide organisation, increasing Corpro's wide range of capabilities in servicing the corrosion control industry.

In 2011 Corpro acquired Hockway a UK manufacturer of transformer rectifier units and cathodic protection systems with facilities both in the UK and the Middle East. Giving the group additional market presence and furthering Corpro's ability to offer customers throughout the world a complete Cathodic Protection service.

Corpro is the leading provider of corrosion control engineering services, systems and equipment with over 46 offices worldwide.

The Engineering Department of Corpro Europe has qualified, experienced engineers in both our UK offices located at Stockton-on-Tees and Redhill which enables us to serve clients throughout the UK, Europe and the world.

Corpro Europe is a prime manufacturer/supplier of Cathodic Protection equipment having foundry and assembly facilities in Stockton on Tees and transformer rectifier and dc power unit and junction box manufacturing carried out at the Hockway plant in Redhill. We offer a range of European and North American manufactured Cathodic Protection products including transformer rectifiers, switch mode dc power units, junction boxes, mixed metal oxide, magnesium, silicon iron, aluminium and zinc anodes, monolithic isolating joints and cables. Corpro Europe also design and manufacture the Anfomatic marine growth prevention systems for cooling water and firewater systems.

Corpro Companies Europe Ltd is a company registered at Companies House in England. Company registration No. 944432.

Quality

The Corpro Europe Quality Management Systems have been assessed and registered as meeting the requirements of ISO 9001:2008.

The Certificate number is LRQ 0850820

The registration covers:

- Design, engineering, manufacture, servicing and surveying of cathodic protection equipment
- Manufacture of electrolytic anti-fouling equipment
- Manufacture of transformer rectifiers and junction boxes

In addition, our Hockway transformer rectifiers and junction boxes have BASEEFA and ATEX approval for use in hazardous areas.

Corpro Europe operates a documented HSE Management System
